

# The ADAPT Community

**A**DAPT is a national grass-roots disability rights group. We work for equality and positive change in policy and programs to include people with disabilities in American society.

The main goal of ADAPT is to end the institutional bias in Medicaid that forces people with disabilities from their home and families into expensive institutions and nursing homes.

ADAPT proposes legislation, advises decision-makers and suggests constructive solutions on local, state and national levels. ADAPT believes in action. Like classic civil rights struggles, we may use nonviolent civil disobedience.

Most importantly, ADAPT members have helped thousands of people with disabilities live in their own homes with their own families instead of being locked away in undesirable institutions.

Do you want to live in a nursing home?
