

## IMPROVING CARE COORDINATION FOR CHILDREN AND YOUTH WITH COMPLEX NEEDS

Our team includes healthcare providers, families, caregivers, and social and human service professionals. We work together through online workshops and virtual meetings supported by the National Care Coordination Academy.

### We:

- ▶ Support meaningful family and youth participation in healthcare decisions.
- ▶ Build healthcare literacy among families and transitioning youth.
- ▶ Increase provider understanding of patient- and family-centered medical homes, how they function, and what is required to sustain them.
- ▶ Enhance communication across health centers, systems and providers.

### We work to address Montana's challenges, which include:

- ▶ Vast geographic distances
- ▶ Limited access to services
- ▶ Competing health organizations
- ▶ Incompatible health record systems
- ▶ Significant behavioral health needs of children and families
- ▶ Minimal understanding of system improvement benchmarks and measures

### Can you help us improve the health and well-being of children, youth and their families? Join Montana's team to:

- ▶ Define what an improved system looks like
- ▶ Identify improvement benchmarks and measures
- ▶ Share the framework across health, home and service sectors
