HOPE WITHOUT HYPE:
The Latest in Alzheimer's Research
An Alzheimer’s Association presentation

Offered for clinicians, researchers, students, aging-services providers, and caregivers.

Wednesday, November 9, 2016

9:00 - 10:00am Skaggs Building Foyer
Coffee and conversation with Dr. Hartley

10:00 - 11:00am Skaggs, room 114
Dr. Hartley presentation

Dr. Hartley will provide an overview of the latest in the science behind Alzheimer’s and related dementias.

No cost to attend. Registration is appreciated. Visit alz.org/montana or call 800.272.3900 (24/7)
Questions to Mindy Renfro at 406.243.2841

Hope without Hype
The Latest in Alzheimer’s Research
How biomarkers, as in the cardiovascular field, can detect when treatments are working. Detecting the complications of aging – microhemorrhages, microstrokes, neurovascular changes – that biomarkers miss. Differentiating between various dementias to personalize early, helpful, lifestyle changes.

We have new insights into why so many – as ripe as any for Alzheimer’s from our present paradigm – thrive to old age with no sign of it.
